Online Java Compiler: Codespace (Github)

Setting up a Java project for GitHub Codespaces

<https://docs.github.com/en/codespaces/setting-up-your-project-for-codespaces/adding-a-dev-container-configuration/setting-up-your-java-project-for-codespaces>

Online Java Compiler: Codespace (Github)

- 1 Sign in to GitHub.com, if you haven't already done so.
- 2 Go to <https://github.com/microsoft/vscode-remote-try-java>.
- 3 Click **Use this template**, then click **Open in a codespace**.
